^A All Mfg's. of fixed monitoring systems provide installation, training, repair and calibration.

re performance standards see ANSI N42.35-2004

^B Personnel dosimeter, here, means self-reading, easily reset devices, not e.g. film badges.

^C Other Mfg's. are listed in the Thomas Register and Nuclear News Buyer's Guide.

Also, portable spectroscopy devices are listed separately on the CRCPD site.

^D μ-rem, here, means meters having electronic compensation of RBE for radiation energy.

^E Some check source & Calibr. material Mfg's: Analytics 404/352-8677,

Canberra (Tennelec & Oxford) 800/243-3955, Isotope Products 661/309-1010,

Laurus Systems 410/ 465-5558, ThermoFisher 800/274-4212

^F Offers α, β, γ & n meter calibration service

^{SNM} Designed to detect special nuclear materials.
