

Upcoming Webinar – **Considerations for Effective Radon Requirements for Schools**

Join our partners at the American Lung Association for a free, 1-hour webinar to learn about preventing radon-related lung cancer in your community through developing and implementing radon risk reduction requirements for school buildings.

Bringing together experts from states with active radon requirements for schools, this panel discussion will offer practical considerations for stakeholders seeking to develop and implement radon requirements for schools that are feasible, enforceable and ultimately successful in preventing radon-related lung cancer.

Considerations for Effective Radon Requirements for Schools

- Wednesday, September 16th | 12:00 p.m. to 1:00 p.m. CT
- Register: [Webinar Registration Page](#)

This workshop is ideal for lung health and environmental advocates, decision makers, public health professionals, cancer coalitions, radon programs, school administration, government employees and other public health stakeholders involved with developing and implementing radon requirements for schools.
